

## EPOXY MORTAR : THE MULTI-FUNCTIONAL FLOORING SOLUTION

client Leading food confectionary manufacturer industry Food & Beverages location Malaysia date 2009-2010

---

### TOTAL INSALLATION AREA

4480 m<sup>2</sup> (New factory)

### CLIENT'S REQUIREMENT

The existing floor serves different kinds of production environment and conditions, from temperature (heat), to dyes (powder and liquid form of sugar, syrups, and other additives), and traffic (forklift, pallet transfer and movement). Thus, the flooring specification called for a low maintenance yet high performance flooring system that is able to suit the different manufacturing environments and conditions while adhering to standard HACCP requirements and requiring minimal downtime only for application.

### SOLUTION OFFERED

**Polygard™ MTX** | Heavy-duty epoxy mortar system in various thickness; from 5mm to 9mm depending on service condition. Highly recommended for medium to heavy-duty application areas in all industries, the system is durable, hardwearing and seamless, thus providing a hygienic and easy to maintain surface. Other product benefits include excellent chemical and abrasion resistance, low odor, and ability to withstand heavy forklift traffic.
