

client IGB (Midvalley City Gardens)    industry Retail    location Klang Valley, Malaysia    date 2010

**TOTAL INSALLATION AREA**

3656 m<sup>2</sup>

**CLIENT'S REQUIREMENT**

The flooring specification called for a cost-effective and durable system to transform the existing power-floated concrete parking deck into a premier parking deck with orange peel finish for safety and easy to maintain features. Crack lines were also visible on site prior to application. Existing coating at the ticketing entrance and exit areas also peeled off easily and were highly worn off.

**SOLUTION OFFERED**

**Polygard™ V-Deck 1000PF** | 1mm epoxy coating system with orange peel finish

Suitable for light to medium-duty application areas, e.g. vehicular parking decks, general traffic areas, and aisles, the attractive orange peel textured finish diffuses light and reduces glare while effectively hiding inconsistencies in concrete surfaces. As it is seamless, it is easy to clean and maintain. The orange peel textured finish is also a better anti-slip alternative finishing for clients who take slip and fall hazards seriously as it is less rough in comparison to the conventional silica quartz non-slip finish.
